Planning your sample project

Can I request a fabric sample?

A small swatch set can be scoped before a production order. Weight, width, fiber composition, and color are recorded with the sample.

How are fabric quantities measured?

Canvas is priced per linear yard at the listed 60 in width. Finished goods are priced per item or set as stated on the card.

Are custom sizes available?

Small runs can use an approved dimensional drawing. A first sample confirms seams, closures, and finished dimensions before the full run.

How should the fabrics be cared for?

The sample cotton pieces are designed for a cool gentle wash and air drying. A production care label would be confirmed for the final fabric and finish.
