MOUNTING	Removable adhesive strips
SETTING	Indoor room identification

Planning your sample project

Do you install the signs?

The listed prices cover fabrication and supplied mounting components. Site measurement and installation are scoped separately after wall type and access are understood.

Can a sign stay outside?

Each product lists its intended setting. The entrance and reception signs are indoor pieces; the A-frame is for sheltered daytime display and should be stored inside overnight.

How many artwork revisions are included?

One placement proof and one revision are included. A new logo or a full wayfinding plan is a separate design service.

Can colors match an existing brand?

Supply a physical color reference when color is critical. Screens and printed proofs are useful guides but materials and finishes can affect the final appearance.

Scope and ordering notes

Prices cover the quantity and specification stated on each product page. Artwork changes, delivery, installation and unusual materials are scoped separately where applicable. This demonstration does not accept orders or payments.

All photographs and landmarks were created for this fictional business. Product dimensions and specifications describe the authored demo range; images are illustrative.
